The Dangerous Desert Island

Four years ago on a desert island there was a volcano about to erupt. There were two people trapped on the island their names were Sam and Amy. Although the desert island was beautiful with its different animals and its sparkly ocean they didn’t want to stay and be hurt by the volcano. They decided to make a plan for brave Sam to climb the volcano. When he was up there he decided the only way to stop the volcano erupting was to use his bottom to plug the hole. Although Sam’s bottom was a bit burnt, he survived and now they live on the island together very happy and safe.
